***Allowable Subject Matter***

Claims 1-3, 5-16, and 19-37 are allowed.

As per claim 1, Merriman et al. was relied upon to disclose determining which advertising object should be selected if two or more advertising object have criteria matching the user and keeping track of how often a particular user has been exposed to the given advertisement. The evaluation of assumed frequencies which warrant the delivery of alternate content is performed at the ad server, not at the client computer of an individual user, as claimed. As per claim 1, a thorough review of the prior art fails to recite the specific conditions of "determining, from within a client computer of an individual user, whether or not the evaluation of the assumed frequencies warrants the delivery of alternate content; wherein the data used in determining whether or not the frequency evaluation of the assumed frequencies with regard to predetermined frequency targets warrants the delivery of alternate content is stored in a web browser of the client computer." Independent claims 13, 27, and 32 recite similar limitations. Claims 2-3, 5-12, 14-16, 19-26, and 28-31, and 33-37 are allowed due to its dependency on independent claims 1, 13, 27, and 32. Examiner notes that claims 4, and 17-18 are cancelled by the applicants.
